

ADVENTURETECHNOLOGY®

2017 PRODUCT GUIDE

WHITewater ELITE SERIES

We've combined our best designs, features and technologies to provide superior performance. All Elite Series paddles come standard with light, buoyant foam core blades, durable Dynel blade trim and your choice of either an ergonomic Full Control Grip (FCG) bent shaft or straight shaft.

AT2 CARBON NEW

The legendary AT2 is the standard against which all other whitewater paddles are measured; the new AT2 Carbon is a continuation of that very legacy. The AT2 Carbon features the same time tested and proven all-water performance blade shape with Dynel edging for maximum abrasion resistance and an optimized construction that is both lighter and stronger than before. Now available in both bent shaft and, for the first time ever, straight shaft options featuring a 100% carbon fiber layup and advanced resin system for added strength with balanced flex.

OFFSET	30-Degree Standard, Custom Available	
BLADE	710 cm ²	

AT5 CARBON NEW

Designed for maximum power and control, the new AT5 Carbon is tuned specifically to handle the most demanding of conditions. The large blade size amplifies paddle strokes and is protected by Dynel edging to ensure purchase and stroke power is retained over time. Available in both bent shaft and straight shaft options featuring a 100% carbon fiber layup and advanced resin system for added strength with balanced flex.

WHITEWATER ADVANCED SERIES

We've taken strength, durability and performance to a whole new level with our Advanced Series whitewater paddles featuring Duraweave® with Innegra™. Blades made with Duraweave are more impact and abrasion resistant than traditional fiberglass or carbon blades, and shafts made with Duraweave are stronger and far less likely to break. Each paddle is offered in a Carbon Duraweave and Fiberglass Duraweave option.

GERONIMO

Featuring our largest Advanced Series blade, the Geronimo is ideal for those who need the most power from each stroke and maximum control in any condition on the river. The Geronimo is ideal for shallow creeks where rocks may prevent full purchase or in any condition where every stroke is critical.

HERCULES

The moderately sized, perfectly balanced blade is the most versatile in the Advanced Series whitewater line. Designed for the boater who spends a lot of time running rivers but likes to stop and play along the way, this paddle was designed for optimal all-around performance. Think of it as the little black dress of kayak paddles.

SAMURAI

Featuring our smallest Advanced Series blade, the Samurai is ideal for paddlers who spend most of their time playboating, or for those who prefer a slightly smaller blade for all-around river running. Designed for quick and responsive strokes, the Samurai will deliver the kind of agile performance playboaters and river-runners expect.

WHITEWATER SPORT SERIES

The Sport Series is the perfect choice for those who seek performance at a value. Sport Series paddles feature a durable fiberglass shaft and tough fiberglass reinforced nylon blades.

TITAN

Inspired by the legendary AT2, the Titan is ideal for all purpose paddling. The moderately sized fiberglass reinforced nylon blade and fiberglass shaft deliver durability while keeping weight to a minimum. Add its bright, vibrant blade color for added visibility on the water, and you have the perfect paddle to inspire the beginner to intermediate paddler.

TOURING ELITE SERIES

The benchmark of excellence in touring paddles, the Elite Series includes the lightest and best performing touring paddles in the line. Loaded with all our premium features, these paddles are designed for superior performance, natural flex, and hours of paddling day after day.

EXODUS CARBON NEW

The newly designed Exodus Carbon features an improved construction and slightly modified blade shape to provide more lift, while retaining the flagship performance characteristics of the original. Durable and lightweight, the Exodus is perfectly balanced to achieve sustainable power without experiencing flutter or fatigue. Now with abrasion-resistant Dynel edges, the Exodus can stand up to the most challenging of expeditions.

ATLAS CARBON NEW

Introducing the Atlas Carbon – the ultimate high angle paddle for the aggressive touring paddler. Lightweight, versatile, powerful and efficient, the Atlas delivers the control needed in the most demanding conditions. A carbon-reinforced layup guarantees strength and agility, and the addition of abrasion-resistant Dynel edges ensures that the potential energy of the paddle won't get lost to wear.

TOURING ADVANCED SERIES

One of the most dependable blades on the market, the Advanced Series offers premium composite materials combined to provide a lightweight and durable paddle available in both ergonomic or straight shafts.

QUEST

One of the most versatile touring paddles on the market featuring lightweight, woven carbon fiber construction, available with two carbon shafts to choose from. Ideal for paddlers who prefer a more relaxed stroke style and posture, but want the ability to paddle aggressively without any flutter.

SHAFT TYPE	CARBON		GLASS

ODYSSEY

Slightly larger blade surface than the Quest with lightweight, woven carbon fiber construction in both straight and ergo shaft options. The oversized blade has a faster catch and substantially more purchase. Ideal for shorter trips, with quicker acceleration and more powerful strokes making it easier to roll decked kayaks and maneuver heavy sit-on-top kayaks.

ORACLE

Our most powerful touring blade featuring lightweight carbon construction and two carbon shaft options. Its blade design has less dihedral than the Quest and Odyssey, providing a more powerful stroke and better stability when bracing or rolling in choppy conditions. Ideal for a more aggressive stroke style, the high angle blade improves boat control and maximizes stroke efficiency.

TOURING SPORT SERIES

The Sport Series offers the perfect choice of paddles for those who seek performance and ergonomics at a value. Whether you're in the market for a high or low angled paddle, ergonomic or straight shaft, the Sport Series brings versatility, durability, and Adventure Technology performance to the entry-level or budget conscious paddler.

PURSUIT GLASS

Ideal for low angle paddling, the Pursuit Glass features your choice of a carbon blend ergonomic shaft or straight shaft. In addition, our signature soft dihedral on the fiberglass reinforced nylon blade offers plenty of performance and versatility. New straight shaft, push-button model available with fiberglass shaft only.

ANGLER ADVANCED SERIES

ODYSSEY ANGLER

The new Odyssey Angler features an oversized fiberglass blade for a faster catch and more purchase in the water, as well as a reinforced Duraweave™ tip for added abrasion resistance. The carbon blend straight shaft offers an additional 5cm in length adjustment for a total of 10cm and infinite feathering. Additional fishing features are abundant, such as measuring tape graphics, a line hook and high visibility aesthetics. Ideal for shorter trips requiring quick acceleration and powerful strokes, the Odyssey makes it easier to maneuver heavier sit-on-top angling kayaks.

LENGTH	220, 230, 240, 250, 260
FERRULE	Unlimited Feathering; Adjustable Length 0-10 cm
WEIGHT	33.5 oz / 950 g
SHAFT	Carbon Blend, Standard Diameter, Measuring Tape Graphic (in. & cm)
BLADE	Fiberglass w/ Duraweave™ Reinforced Tip; Line Hook; 640 cm ²

US PATENT # 9,359,055

ORACLE ANGLER

Our most powerful touring paddle has been transformed into a new high-performance angling paddle. Its blade design has less dihedral than the Odyssey Angler, providing an even more powerful stroke for ultimate control, with a Duraweave™ reinforced tip for superior abrasion resistance. Also featuring an extended ferrule for 10cm of length adjustment, unlimited feathering, and a measuring tape graphic on the carbon blend straight shaft, as well as a line hook and colorful digital camo graphic enhancements on the blade. Ideal for a more aggressive stroke style, the high angle blade improves boat control and maximizes stroke efficiency.

LENGTH	220, 230, 240, 250, 260

ANGLER SPORT SERIES

PURSUIT ANGLER

Ideal for any paddling style, the new Pursuit Angler features a signature fiberglass reinforced injection molded nylon blade for a full range of performance and versatility, and the same fully-adjustable ferrule system – allowing up to 10cm of length adjustment and unlimited feathering – found in the Advanced Angler carbon blend straight shafts. Measuring tape graphics and a line hook cutout are sure to give both beginner and intermediate anglers a competitive edge.

LENGTH	220, 230, 240, 250, 260
FERRULE	Unlimited Feathering; Adjustable Length 0-10 cm
WEIGHT	36.5 oz / 1035 g
SHAFT	Carbon Blend; Standard Diameter; Measuring Tape Graphic (in. & cm)
BLADE	Fiberglass Reinforced Nylon; Line Hook; 605 cm ²

SEARCH ANGLER

Designed with the high angle paddler in mind, the new Search Angler features fiberglass reinforced nylon blades and a carbon blend straight shaft decked out with the same fishing-specific graphics and features introduced across the entire Angler series. The blade is designed with less dihedral for added power and control – an ideal paddle for heavier sit-on-top fishing kayaks or well-conditioned paddlers looking to paddle to harder to reach spots and fish all day.

LENGTH	220, 230, 240, 250, 260
FERRULE	Unlimited Feathering; Adjustable Length 0-10 cm
WEIGHT	37.0 oz / 1049 g
SHAFT	Carbon Blend; Standard Diameter; Measuring Tape Graphic (in. & cm)

NAVIGATING THE PRODUCT FEATURES

FULL CONTROL GRIP (FCG)

The foundation of Adventure Technology is our patented Full Control Grip (FCG). Designed with sports physiologists, the unique AT bent shaft design bends the shaft on two planes in order to properly align the bones in your forearms and wrists. It also has a more ergonomic grip area.

IMPROVED PERFORMANCE

ALIGNMENT – Ensures the bones in your forearms bear the load of each stroke, not the easily-tweaked ligaments taxed by conventional designs.

INDEXING – The uniquely shaped grip area allows for a more natural hand position. If the shaft does not fit your grip then there is extra fatigue on your joints and ligaments with every stroke. The bottom of the grip area is flat which matches the flat part of the fingers that wrap around and catch this part of the paddle.

LESS SLIP – Indexing along with the shaft's natural bend orients the paddle in your hand even during extreme bracing or rolling situations. Experience the confidence of always knowing correct hand placement especially when it matters most.

NATURAL GRIP – FCG allows you to quickly find or recover hand placement on your paddle, and continue to grip it comfortably all day without wrist and forearm fatigue, and allows the user full control of blade position.

REDUCED WEAR & TEAR ON BODY

LESS INJURIES – Your wrist is completely neutral as you pull through the most powerful phase of the stroke, allowing stronger forearm bones to bear the load.

LESS FATIGUE – Ergonomics means more efficiency with each stroke and less grip pressure so you can paddle in comfort all day long.

DYNEL BLADE EDGE

EXTENDED BLADE LIFE – Another AT first, Dynel edging prevents your paddle blade from wearing down.

RETAINS BLADE POWER – Use your paddle for years and not worry about losing power per stroke over time.

FOAM CORE BLADE

MORE CONTROL (WHITewater) – Blade rises to the surface. Loosen your grip – you'll know which way is up when you're rolling. Great feature for playboating or running big water.

MORE CONTROL (TOURING) – Blade is thicker and more forgiving, making it easier to move through the water. Buoyancy also makes bracing easier.

EFFICIENT & SMOOTH STROKE – Delivers an extremely smooth stroke in the water with less flutter and more energy in your stroke because it rises to the surface naturally.

LESS WEIGHT – Foam core blades are lighter than traditional blades and feel even lighter in the water.

DURAWEAVE® WITH INNEGRA™

It's time for a new era of paddling. It's time for a technological advancement that takes whitewater paddles to a whole new level. It's time for a lighter, stronger, more durable, and safer paddle...it's time for a revolution. Introducing AT's proprietary composite material, Duraweave with Innegra.

BLADES MADE WITH DURAWEAVE ARE:

- Lighter, more buoyant, and have a lower swing weight
- More abrasion resistant and less likely to splinter, crack, or delaminate

SHAFTS MADE WITH DURAWEAVE ARE:

- Powerful, yet have a natural and forgiving flex
- Stronger and far less likely to break

IMPACT RESISTANCE

ABRASION RESISTANCE

SECONDARY STRENGTH

WEIGHT

BLADE TECHNOLOGY

SHAFT TECHNOLOGY

SECONDARY STRENGTH

Duraweave construction provides unparalleled secondary strength.

In the event that a shaft does crack, the unique molecular structure of Duraweave prevents cracks from spreading which significantly reduces the likelihood of complete shaft failure.

ADJUSTABLE FERRULE SYSTEM

QUICK & EASY – Simply open the lever, adjust the shaft for custom fit, and close the lever. Enjoy unlimited feathering and up to 5cm of increased length.

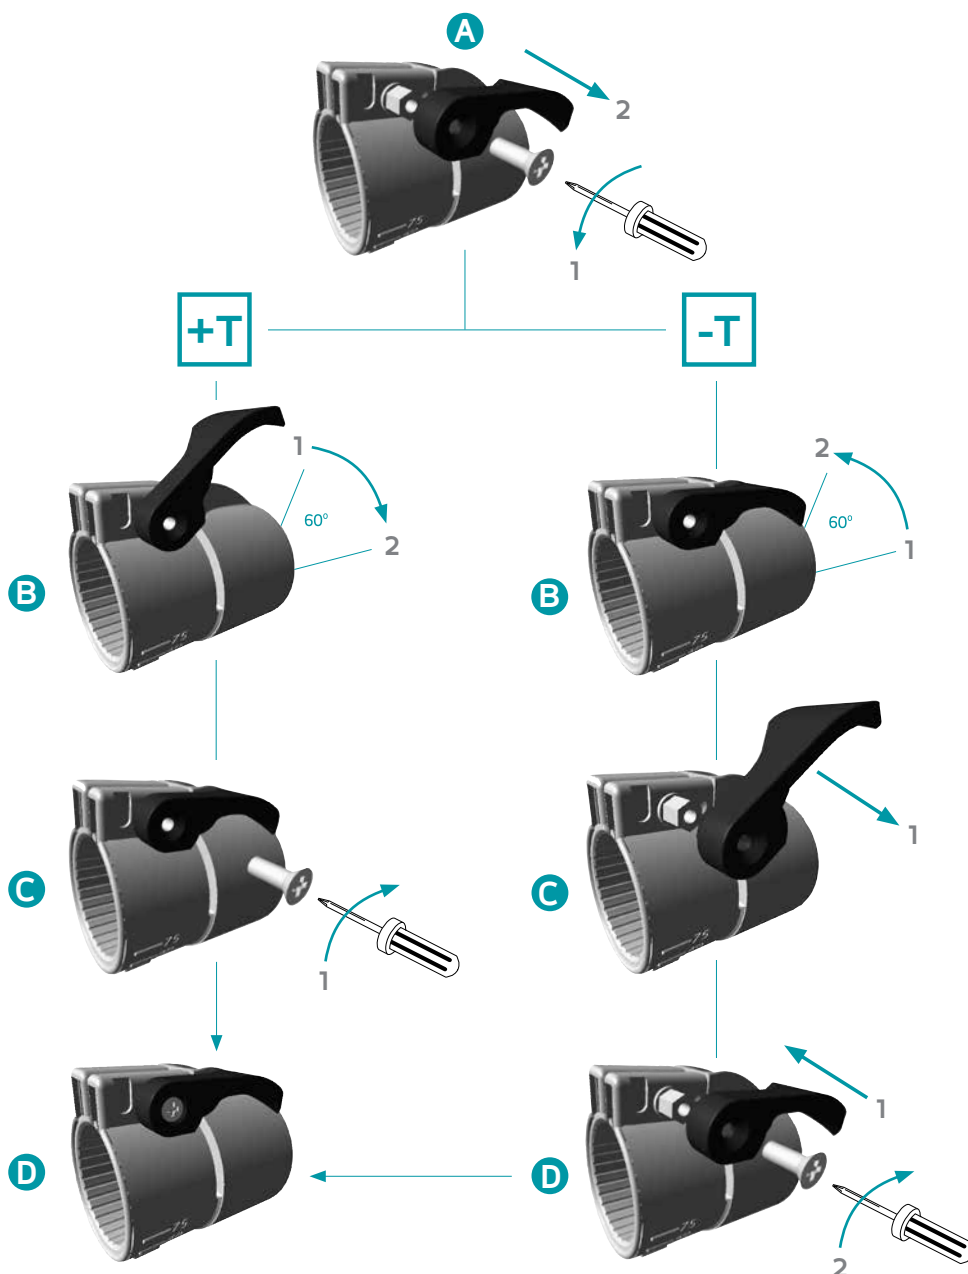

LOW WEIGHT – Ferrule system is compact and efficient to reduce overall weight.

TECHNOLOGY – Engineered for a precise fit and smooth operation. Specifically designed components for maximum compression and long-lasting durability. Made with heavy-duty fiberglass reinforced nylon and stainless steel hardware.

ADJUSTABLE – Easy to remove lever makes tweaking tension a cinch.

HASSLE FREE MAINTENANCE – Just pull apart, rinse with freshwater, and start planning your next trip on the water.

Go to ATpaddles.com for more information on the Adjustable Ferrule System and instructions for adjusting tension.

AT SIZING CHART

PADDLE LENGTH

Select AT paddles are molded with the blade and shaft as a unit. This gives our paddles their light swing weight and uniform flex. Because of this, and the importance of having the ergonomic grips in the correct place, sizing for your AT needs some extra attention. Use these standards to help. Add or subtract if your normal grip is wider or narrower. Generally, shorter people will want shorter paddles. Use the chart as a guideline unless you are familiar with the product and know exactly what you want.

	OVER 6'	240		OVER 6'	250

CARE FOR YOUR PADDLE

AT paddles are built for years of use with little maintenance. It is recommended to complete a visual inspection after each trip. For two-piece paddles, occasionally check the ferrule system. Sand or grit can be easily cleaned by rinsing off with fresh water. Any sharp or rough spots on the edges of the paddle blades can be smoothed with fine sandpaper. Do not sand the shaft! If a gouge in a blade penetrates the fibers you can paint a little epoxy over the wound. If you are not comfortable with any paddle repair, contact us. Repairs due to abuse, negligence or normal wear may be repaired for a reasonable charge.

I'D RATHER BE PADDLING GUARANTEE

Our commitment to quality products made from durable materials is evident in every Adventure Technology paddle. That's why we offer one of the industry's strongest warranties for our products.*

If your product fails within 1 year of original purchase date due to a manufacturer defect, you can quickly receive a replacement by returning the product to the store that you bought it from or by contacting us directly. Products damaged as a result of normal wear and tear or abuse will not be covered, however may be eligible for a quick repair at a reasonable cost.

*LIMITED LIFETIME WARRANTY OFFERED ON AT2 SUPERDUTY SHAFT

Some limitations apply. Visit ATpaddles.com for full details.
